

DM200i™ Mailing systems maximise office productivity

Every business needs to operate as efficiently as possible. Even daily, routine tasks need to be performed in a productive manner. The easy-to-use, DM200i™ Mailing System will amaze you with its simplicity and advanced capabilities.

The power of IntelliLink®

The cutting-edge IntelliLink® technology contained within the DM200i™ provides an easy to use secure gateway to advanced features and services. These include automatic downloads of postal rate changes and software upgrades. The DM200i™ also has the capability to download logos and envelope messaging transforming once manual processes into quick operations.

Time saver

Fast, accurate postage re-crediting

IntelliLink® technology provides convenient, hassle free, postal rates downloads, software updates, and one-touch postage refills with Postage by Phone®. Get up to 55 days free credit with the post now, pay later facility of Purchase PowerSM

- **Easy to use**
All controls are fully integrated on one clear easy to use control panel backed up with user-friendly instructions to guide the operator through each stage of processing mail.
- **Reduced mail preparation time**
Seal and post your envelopes at the same time, resulting in a professional ready to mail document. Larger mail is quickly processed with self adhesive tape strips. Time is saved with 5 presets for your most commonly used jobs.
- **Auto-dating eliminates returned mail due to misdating**
An internal clock advances the date automatically. Operators can advance the date to get a jump on processing tomorrow's mail.

Incoming mail dating

Date and time stamping capability ensures your incoming mail is handled efficiently.

- **Digital technology is a gateway to the future**

The DM200i™'s digital meter indicia satisfies all current postal regulations, and the technology's flexibility makes the DM200i™ adaptable for the future.

Cost saver

Correct value postage - every letter, every time

The DM200i™ incorporates a 5kg integral weighing platform, freeing up desk space and guaranteeing that each letter or package bears the correct postage value. Differential weighing technology enables batches of mixed mail to be processed quickly and efficiently. The differential mail feature means that a collection of mail can be placed on the scale and the machine will calculate the correct postage for each mailpiece as it is removed from the pile.

- **Information management**

It's crucial for businesses to account for postage expenses. Departmental or client postage spend can be easily tracked and reported with the 100 accounts available on the DM200i™.

- **Strengthen your brand with targeted and effective mailing**

Transform your mail piece into eye-catching communications. Advertise your business on every mail piece with sharp inkjet printing to build your professional image. Print a return address alongside your customised envelope messaging to ensure undelivered mail is returned thus improving the accuracy of your mailing database and ultimately reducing expenditure on subsequent mail shots.

- **Energy star compliant**

Energy Star qualified mailing machines automatically enter a low-power "sleep" mode after a period of inactivity. Spending a large portion of time in low-power mode not only saves energy but helps printing equipment run cooler and last longer.

Specifications

Physical dimensions

Length	345mm
Depth	400mm
Height	375mm
Weight	6.8 kg approximate

Speed

(maximum)	40 letters per minute
