Office brilliance

Time is of the essence. And there never seems to be enough of it in a day. Getting your mail out the door and to its destination shouldn't be a chore. It should be an effortless process that can be integrated into your business operation, keeping noise levels low, taking up little space, and creating no disruptions. It should have an advanced level of technology that is easy for everyone to use, with capabilities you can count on.

Enter the DM475c™ Digital Mailing System. The system collaborates with you so you can communicate effectively with your customers and meet your mailing deadlines.

It has loads of cost savings capabilities like dimensional rating, Weigh-On-The-Way® (WOW) and access to a comprehensive range of postal services beyond simple first and second class. And it's all powered by Pitney Bowes unique IntelliLink® technology.

What's NOW!

Weigh-On-The-Way® (WOW) – Eliminate sorting mailpieces by weight and size with in-line weighing. Process up to 80 letters per minute in WOW mode. Dimensional rating accurately determines the cost for each piece of mail based on its length, width, thickness and weight – all in compliance with postal regulations.

Colour graphics display – A user friendly, crisp, clear color display makes for quick and easy selections – giving you step-by-step instructions.

Our unique IntelliLink™ technology – Lets you update your system with the latest software and postage rates through the touch of a button. The Control Center is user friendly, and helps guide you through as you process your mail.

Built in savings – by franking your mail, instead of using stamps, you're already saving up to 7p per item.

Accountability – Expanded accounting capabilities to increase your productivity with the option of Budget Manager or INVIEW™ Accounting. Print reports or export data to a PC or to the web.

Unrivalled efficiency

- Preset up to 10 jobs for quick access to routine tasks
- QWERTY keyboard for fast and easy operation with full color display
- Download postal updates, software upgrades, postal inscriptions and graphics

My Account

Through Pitney Bowes online, get access to your account info when you need it.

- Choose how to pay for postage, get a postage advance, or earn interest on the balance in your Reserve Account
- Get online access to your account information at My Account and track payment history, monitor meter activity, pay bills, order supplies and request service

Constant connection

To access postage and software downloads, there's no need to move the mailing system or to install a phone line. Simply connect to a local LAN connection and you'll get:

- 24/7 access to download software upgrades and postage
- Painless access to postal rate updates

Promoting business

Use your mail to advertise. The DM475c™ Digital Mailing System comes with 10 standard envelope ads. You can order additional ads online and download them directly into the IntelliLink® Control Center.

Big results

Increase productivity in your office with the capabilities you would expect from a bigger mailing system.

Integrated weighing – Easily process individual, oversize pieces by determining the precise postage with an integrated scale.

Automatic processing – Automatic feeding, sealing and imprinting postage at speeds up to 120 letters per minute helps to effectively manage large mailings.

Flexible feeding – Handles material up to 8mm thick and sizes ranging from postcards up to C4 envelopes.

Convenient updates – Obtain postage when it's convenient for you and handle rate changes more easily with automatic updates.

Rate selection – Select the most effective and economical postage rates for your mail.

Reduce return mail – Operators can advance the date to get a head start on processing the next day's mail. Mail is not returned due to misdating.

Track incoming mail – Mail date stamp provides dual functionality to track incoming mail efficiently.

Postage accounting – Tracks up to 50 accounts, data can also be printed or exported to a PC.

Expanded accounting options – increase your tracking and reporting capabilities up to 1,500 accounts with Pitney Bowes Budget Manager.
