Your mail is our strength

The franking machine
with integrated scales

mymail

my**mail** is small, smart, clever and **very practical.**

my**mail** - **the new digital desktop franking machine**

my**mail**
gives me room

I like my office space uncluttered. my**mail** fits! my**mail** looks good and it's compact and modest. It has **integrated scales** that save space and avoid tangled cables. That's what I like: simple, clever practical solutions.

my**mail**
& my**office**

Why do I need a franking machine, when I can use stamps? Why do I need a coffee maker, a laptop, a cellphone . . . **Simple: All these things make my life easier and better.** They're part of me, so is my**mail**.

my**mail** does
more with my mail

the secret of my success: **professionalism with a personal touch.** my**mail** lets my mail reflect my success. At the press of a button, my mail goes out with **my own personalised advertising slogan.**

my**mail** -
my kind of machine

A chip card for total convenience

A chipcard makes my**mail** totally flexible. I use chipcards for loading new meter ads, when I move office, when postage rates change.
Or I use coded cards to let different users access different department accounts.

**Frank a letter as easily
as making a phone call.**
Simple to operate,
easy to read.
my**mail** -
my kind of machine.

Compose text just like an SMS

An important message for my
customer - on the envelope?
my**mail** makes it possible.
Compose text with the keyboard,
just like an SMS, and print . . .
that's it!
**A clever way to make my mail
stand out.**

my**mail** makes no mistakes

What does my envelope or package weigh?
How much postage? my**mail** knows the
answer. **The integrated scale weighs mail up
to 2 kilograms,** and automatically calculates
the right postage.

I need more postage!
No problem, it's loaded by modem down my
telephone line.

**Franking machine
with optional integrated
scales for small mail volumes**
