PostBase one

ICONIC INNOVATIVE INVESTMENT

PostBase one

NATURAL PROGRESSION

ICONIC

PostBase One is a modular franking system using the latest technology from dynamic weighing, powerful accounting to letter processing at up to 20mm thickness. The easy to use icon driven operating system means that 99% of tasks are completed using only 3 touches of the full colour screen.

With high operating speeds and high volume letter processing, PostBase One fits perfectly into your office or mailroom environment and can be expanded to suit the needs of your growing business.

With Royal Mail Mailmark at its forefront, PostBase One can optimise your postage spend on every letter you send.

INNOVATIVE

PostBase One uses the very latest in technology from Wi-Fi connectivity to 3G and High speed LAN as well as performing software updates, tariff downloads and data uploads seamlessly ensuring your system is always updated and making sure you never under or overpay for postage.

PostBase one

DYNAMIC WEIGHING AND FRANKING

INVESTMENT

PostBase One dynamic weighing and franking system with 3rd carrier capabilities and powerful accounting options, one button and a colour touchscreen makes this professional, flexible mailing system simple and cost efficient for any mailing office.

► **Cost saving** using a wide variety of carrier options means that PostBase One is even more flexible allowing you to measure and regulate your postage spend.

► **Dynamic weighing** processing, weighing, sealing and franking letters at 100 per minute make the dynamic postage scale a perfect addition to PostBase One.

► **Mailmark ready** PostBase One can take advantage of the postage savings using Royal Mail Mailmark as well as a host of other cost saving benefits.

► **Cost management** via our powerful postage software that integrates perfectly with PostBase One allowing you to export postage data to your preferred accounting package.

postBase one

01

High Capacity Parcel Scale
Place the high capacity parcel scale wherever you need it, weighing up to 7kg this parcel or letter scale is extremely accurate meaning that you never under or over pay for your postage.

02

Colour Touchscreen
As easy to operate as your smart phone or tablet, we designed the PostBase One to have a simple to navigate, icon driven menu system allowing you to process your mail quickly and efficiently.

03

Automatic Feeder
Processing letters with a thickness of up to 20mm the PostBase One automatic letter feeder is truly incredible. Letters are processed using vertical feeding ensuring true mixed mail capabilities.

04

Sealing module
The PostBase One sealing module allows you to feed unsealed gummed envelopes through the system at which point the PostBase One will seal them securely before franking.

05

Dynamic Weighing
Imagine feeding mixed size and weight letters through the PostBase One and then having the system weigh, price and frank them automatically at 100 letters per minute, that's exactly what the dynamic scale does.

06

Label Dispenser
Every PostBase One as standard has a self adhesive label dispenser making it simple and easy to weigh parcels and print a franked label ready to be attached to your consignment.

07

Next generation inking system
Our new technology easyconnect inking system allows PostBase One to use either print cartridges or an easyconnect bulk ink tank, ideal for high volume users.

08

Letter catcher/stacker
The PostBase One as standard has a letter catching module but can be further upgraded with a letter stacker making it easier to present clean mail to your letter carrier.

PostBase one

POWERFUL POSTBASE ONE

SIMPLE, FLEXIBLE TECHNOLOGY

The PostBase One colour touch screen was designed to be easy to navigate with an icon driven menu system allowing you to process your post simply and efficiently.

INTUITIVE MENU SYSTEM

Every function of the PostBase One system is at your fingertips including a home menu designed to have every function you need to process your post at a glance.

INTEGRATED POSTAL SCALE

The PostBase One postal scale is a modular part of the franking system, meaning you can place it wherever you need to weigh larger items.

YOUR LOGO ON EVERY LETTER

As well as your logo on every letter you send, you can also put your own advertising messages on every mail piece advising your customers of special offers for example.

VERTICAL FEEDING TECHNOLOGY

Using the PostBase One automatic feeder, the system can automatically process your postal items up to 20mm thick making it a true mixed mail franking system.

HIGH CAPACITY FEED DECK

With the PostBase One high capacity feed deck the system can hold up to 300 letters improving the processing speed of your mail run.

HIGH VOLUME LETTER STACKER

The ability to neatly stack your processed mail means that it is easier to present clean mail to carriers allowing you to benefit from the biggest discounts available.

INKJET PRINTING SYSTEM

Incredibly quick and efficient, our inkjet printing system used in the PostBase One uses specially developed HP cartridges making it reliable and cost effective.

NAVIGATOR PLUS, MODERN POSTAGE DATA MANAGEMENT FROM FP

Navigator Plus is a powerful software addition to PostBase One from FP. Navigator Plus allows you to control the PostBase One from a larger screen and account for every letter franked through the system as well as export the detailed postage data into your preferred accounting package for analysis and cost allocation.

PURE AND POWERFUL POSTAGE ACCOUNTING SOFTWARE: MAILREPORT ONE

The professional choice when it comes to postage cost allocation with unlimited cost accounts to monitor every department or sub department's postage spend down to the letter.

Export report data in a wide variety of formats including .csv and .xls, Mailreport One from FP works seamlessly with the PostBase One franking system.
